Sagar Ghevde

IT Support Specialist | Endpoint Management | Systems Administration

Email: sagarghevde@gmail.com https://www.linkedin.com/in/sagarghevde/

Professional Summary

Results-driven IT professional with 15+ years of experience supporting users, managing systems, and resolving technical issues across MSP and enterprise environments. Proficient in ServiceNow, Microsoft 365, VMware, Intune, JAMF, and Microsoft Entra (Azure AD/Active Directory), with strong expertise in endpoint protection using Sophos MSP. Experienced with RMM tools such as Syncro and Splashtop for remote support, automation, and patch management. I am skilled in backup and recovery using Comet, Duplicati, and Windows Server Backup. Adept in PowerShell scripting, firewall configuration, DNS/DHCP, and imaging systems. Consistently recognized for 98%+ user satisfaction and a proactive, secure, and solutions-oriented IT support approach.

Professional Experience

IT Support Specialist

The Human IT Company | Vancouver, BC | Oct 2023 – Present

- Delivered Tier 2 support for SMB clients across Windows and macOS, ensuring timely resolution for escalations
- Managed endpoint security and VPN access via Sophos Central, improving network protection
- Deployed zero-touch firewall setups and fine-tuned policies, reducing setup time for multi-client environments
- Automated patching, cleanup, and monitoring tasks with Syncro scripting, boosting efficiency and consistency
- Monitored Comet and Duplicati backups, validating recovery points to ensure compliance and data integrity
- Configured UniFi APs and VLANs through UniFi Controller, optimizing wireless coverage and performance
- Tracked SLAs and ticket workflows in Autotask, consistently maintaining 95%+ customer satisfaction ratings
- Provisioned users in Microsoft 365 and Entra ID with MFA and role-based access, streamlining onboarding
- Conducted IT audits, asset inventory, and documentation across client sites, supporting SLA compliance
- Handled onboarding/offboarding, device setup, and end-user training, ensuring smooth user transitions
- Acted as client liaison for IT service delivery, aligning technical solutions with business requirements
- Implemented BitLocker encryption policies via RMM scripts, ensuring endpoint security and recovery key compliance across client environments

Computer & Mobile Technician / Store Manager

Dr. Phone Fix | Kamloops, BC | Oct 2022 – Oct 2023

- Diagnosed and repaired smartphones, tablets, laptops, and desktops, maintaining 95%+ customer satisfaction
- Performed hardware replacements, OS reinstalls, device flashing, and connectivity troubleshooting
- Configured devices with custom apps, user profiles, and restored data across Android, iOS, and Windows
- Managed daily store operations including inventory, vendor relations, and sales reporting
- Implemented workflow improvements and quality checks, reducing post-repair issues by 20%
- Trained and mentored junior technicians, improving team efficiency and service turnaround time by 15%
- Delivered walk-in tech support and built long-term customer relationships through clear, honest communication
- Maintained accurate repair logs, inventory records, and ensured process consistency through documentation

Senior Information Technology Specialist

Dentsu Aegis Network | Mumbai, India | Jan 2018 – Jul 2022

- Supported 1,000+ end users across departments, resolving technical issues within SLA-defined timelines
- Escalated global incidents and coordinated with vendors to restore services promptly
- Managed AD, Entra ID, and Group Policy to secure access and streamline user onboarding/offboarding
- Administered SCCM for imaging, patching, remote support, and app deployment to Windows endpoints
- Deployed and monitored macOS and Windows endpoints via Intune and JAMF to enforce policy compliance
- Handled incidents and requests in ServiceNow, following ITIL practices for change and incident management
- Created and maintained SOPs, knowledge articles, and troubleshooting documentation
- Collaborated with engineering, compliance, and management on infrastructure upgrades and IT audits
- Emphasis on collaboration, support scale, and process maturity reflects enterprise-level support in a global organization

IT Support Technician

Prodcon Tech. Services | Mumbai, India | Jun 2007 – Dec 2017

- Provided onsite support for enterprise clients in healthcare, marketing, and research sectors.
- Ensured timely resolution of hardware, OS, and network issues in diverse, high-demand environments
- Administered Active Directory (user provisioning, password resets, security group updates)
- Deployed and configured Windows-based desktops/laptops, including imaging and application installation
- Troubleshot LAN/WAN connectivity, printer queues, and VPN access in a multi-user environment
- Maintained IT asset inventory and documented support logs to assist with SLA compliance and audits
- Tracked and resolved tickets using internal helpdesk systems, ensuring timely closure aligned with SLA targets
- Provided informal user training on email setup, printer configuration, and basic security practices
